Art Unit: 1646

1) Claims 27, 29, 32 to 37, 39 and 43 to 45 are pending in the instant application. Claims 43 to 45 have been amended and claims 46 and 48 have been canceled as requested by Applicant in the correspondence filed12 July of 2004. As all of the pending claims are allowable, they have been renumbered 1 to 12, respectively.

- The instant specification does not comply with 37 C.F.R. § 1.84(U)(1), which states that partial views of a drawing which are intended to form one complete view, whether contained on one or several sheets, **must be identified by the same number followed by a capital letter**. Figures 1 to 6, 8 and 9 of the instant application are each presented multiple panels. Correction is required. Applicant is reminded that once the drawings are changed to meet the separate numbering requirement of 37 C.F.R. § 1.84(U)(1), Applicant is required to file an amendment to change the Brief Description of the Drawings and the rest of the specification accordingly.
- 3) The drawings in the instant application do not comply with 37 C.F.R. § 1.821(d), which requires a reference to a particular sequence identifier (SEQ ID NO:) be made in the specification and claims wherever a reference is made to that sequence. M.P.E.P. 2422.02 expressly states that "when a sequence is presented in a drawing, regardless of the format or the manner of presentation of that sequence in the drawing, the sequence must still be included in the Sequence Listing and the sequence identifier ("SEQ ID NO:X") must be used, either in the drawing or in the Brief Description of the Drawings". Figures 9 and 10, for example, refer to specific sequences ("rat VR1") without employing the mandatory sequence identifiers. Figures 13 and 15 also present unidentified amino acid sequences. Correction is required.
